

B

February 4, 1957

Dear Dr. Beadle:

Would you do me the favor of routing the enclosures per the slip attached? I may have inadvertently overlooked potentially interested recipients, and will be glad to be reminded if that is the case.

You doubtless have been 'in on' our discussions with Stanford and Berkeley. We are having a very difficult time deciding what to do, the more so as Madison has also been a splendid university, and there are further prospects for development, e.g. genetics in the medical school. I wish I had an occasion to talk this over with a few people like yourself, but won't presume to ask your advice at such long reach.

One point: if we do go to California, I hope we can use the occasion to strengthen cordial relations with our friends and colleagues at Pasadena; we won't be at your back door, but at least by comparison we will be on the same block.

With best regards,

Yours sincerely,

Joshua Lederberg
